## The Annual Quality Assurance Report (AQAR) of the IQAC

All NAAC accredited institutions will submit an annual self-reviewed progress report to NAAC, through its IQAC. The report is to detail the tangible results achieved in key areas, specifically identified by the institutional IQAC at the beginning of the academic year. The AQAR will detail the results of the perspective plan worked out by the IQAC. (Note: The AQAR period would be the Academic Year. For example, July 1, 2012 to June 30, 2013)

### 7.3 Best Practice:

#### i) TITLE – Students Peer Teaching

Peer teaching is a method by which one student teaches other students about a given topic. It's a teaching method where students teach students. The peer tutor takes on the role of a teacher and imparts knowledge about the given topic, current issues like national integrity, social responsibility, civic awareness.

#### ii) Goal

Peer teaching is one of the best among best Practices adopted by our Institution. It is intended to complement the regular classroom instruction. It is not used as substitute for professional teaching. Peer teaching is used as a method of teaching-learning process to achieve the following goals.

- To enable both the tutor and tutee to develop strong personality.
- To help the students to develop communication, presentation and memory enhancing skills.
- To build team spirit, self confidence, social competence and gain a mastery over the subject.
- To enable the students in overcoming fear, hesitation and timidity.
- To establish a strong bonding among the students.
- To train the students to acquire all the important characteristics needed for a successful career.
- To give the students a first-hand experience of acting as a teacher.
- To motivate students to pursue higher education.
- To help students develop concentration and be more focused.

#### iii) Context

With the above mentioned goals in mind ,our Institution has adopted peer teaching to help the students in understanding the subject in a better way, thereby enhancing their overall personality. Knowledge about the subject, hard work, perseverance, patience are needed for peer teaching. There is a need of training the peers in all skills like presentation, communication and memory enhancing skills. Majority of students are from rural back ground, and they are introvert. So, the Institution is using peer teaching as a means to attain the vision of providing students quality education, excellence, empowerment and employment and to help the students to be successful citizens.

The language barrier poses a great challenge in implementing peer teaching as majority of students are from Kannada medium background and lack English speaking skills. They have to be trained to communicate in English.

Motivating all the students to act as peer tutors is another challenge, as the students hesitate to take-up peer teaching due to inferiority complex, lack of will power and stage fear. Though the students are intelligent and advance learners but have less confidence and lack presentation skills in playing the role of peer tutors.

The faculty try their level best to identify the students who can act as peer teachers and guide them in:

- Identifying themes and topics that are suitable to teach the juniors.
- Designing instructional materials
- To control the tutees and maintain discipline in class.
- Monitoring the learner's achievement by the teacher.
- Judicious and effective time management.

#### **iv) Practice**

The Institution has a well defined process for peer teaching. To inculcate this practice, we adopt the mechanism of- '**Input** -> Processing -> Output'.

The faculty identify the students who can be effective tutors. Such students are trained before hand in presenting the given topic. Along with using the traditional method of chalk and talk, the peer tutors are also encouraged to use ICT based teaching methods. Peer tutors are able to use smart boards and make power point presentation also. The faculty guides the students for acquiring reference books, journals and other study materials from the library to

enable the peer tutors to prepare for the topic entrusted to them. The Institution also provides free internet facility which enables the peer tutors to refer to web sources.

#### **Strategies for training peer tutors :-**

- **Orientation to students about the meaning and importance of peer teaching.**

Orientation plays a vital role in training the peers. During the orientation session the students are given information about peer teaching and its benefits. The peers are informed of all the key aspects they should have like communication, presentation, overcoming fear, writing, memory skills to be good peer teachers.

- **Motivating students to be peer teachers.**

Inspiring and motivating students helps a lot to make many students take up peer teaching. Through motivation, the students realize their own potentialities and gradually gain confidence. Being adolescents, the students attach more importance to and work for peer approval.

- **Selection of peers –**

The peers are selected among the group of students by personal interview, counseling, testing their existing stock of knowledge, their involvement in the class and interest. Initially, the students who are better in communication and confident enough are selected. Later the others who volunteer to be peer tutors are also given a chance to be peer teachers. After selection the peers are given training for their further improvement.

**Training by faculty :** Adequate training is provided to the peer tutors by the faculty the faculty instruct them about the various methods of teaching used for the better understanding of the subject matter and to bring the quality in teaching learning process.

**Use of ICT in the classroom** –To meet the challenges in today's world, modern and latest means of teaching is of utmost important. The tutors are trained to use ICT facilities available in the Institution. The students learn the methods of teaching along with the traditional chalk and talk method.

- **Controlling the class** – The selected students are also given training on controlling the class. The tutor is trained to prepare properly and make use of different ways to control the class. They are trained to deliver the given topic effectively in a clear and audible manner.

- **Problem solving** –The tutors are trained on the means they have to adopt to clarify the doubts and solve the problems which arrive during the teaching. In case the tutor is unable to convince the students, the concerned faculty will solve the problem.
- **Motivating the students for asking questions** - The peer by her dynamic and smart teaching can definitely inspire the student , to ask various questions. The students will be curious enough to know more from the peer tutor.
- **Presentation** - All the efforts of peer will be a total flop, if she doesn't have the art of presentation .The peer should have the art to present all the information she has prepared. She should have language clarity, command over the topic be audible to teach the given topic. The faculty train the peer tutors in presentation skills.
- **Interaction with the students** -Teaching is a two way process. Through interaction, students gain more information. The peer tutors are trained to set aside some time for interaction with the tutees.
- **Feedback** - Based on the verbal feedback the peer tutor is instructed to improve in aspects where improvement is required. The faculty also understand the weakness of the peer tutors and train them to overcome the same.
- **Suggestions for further improvement** –The faculty and the students give valuable suggestions to the peer tutor, after she has completed her lesson.
- **Rewarding** – The peer tutors are complemented for their earnest efforts. Certificate of appreciation is given to the peer tutors. This practice has inspired other students to take up peer teaching.

#### v) Evidence of Success

The practice of peer teaching has definitely been a boon to the Institution. This has helped the students who were engaged in peer teaching during their under graduate course bag University ranks and gold medals and are toppers of our Institution. They have also performed excellently in campus selections and are employed in different sectors as teachers, counselors, buearcats, lawyers, journalists, news readers, chartered accountants etc. Peer tutors have learnt all the soft skills. The tutees are also influenced by the tutors and have come forward to act as tutors.

The following evidences hold a mirror to prove that peer teaching has been an effective tool to provide a student centric teaching – learning atmosphere in our Institution.

- Peer teaching has enabled the students to develop the art of “Time Management”. They are able to present the topic in stipulated time. They know to divide the time perfectly well on the things, which need to be highlighted and on things, where a mere mention is enough. As a result, our students, placed in many organizations are able to achieve the set target on time. Peer teaching has helped them to present papers in seminars, conferences and workshops at different levels.
- Peer teaching has also contributed in enabling our students to organize and be excellent master of ceremonies organized in our college. Some of our alumni are journalist, news readers in regional and local TV channels such as Janashri, Amogha and TV9.

The tutors have also developed the skill of interactive learning. Through their interactions with the tutees, the tutors are involved in participatory learning. This interaction has led to building confidence and asserting themselves boldly. It has also contributed to make them alert, have control over their temper and give their best. Peer teaching has helped the students to realize what it means to be in the shoes of a teacher. We have number of students employed as teachers at different levels providing valuable training to their students.

- Peer teaching has enabled the students to know the latest developments in the subjects they learn. It has provided them an opportunity not only to grow intellectually, but also to share it with the tutees. As a result, few students have cleared the competitive exams.
- Peer teaching has helped the students to develop a spirit of friendship and unity. The senior students promptly help the juniors and guide them in all respects. The students feel more comfortable in interacting with the peer. This has also resulted in our students employed as counselors.
- Peer teaching gives them the first hand experience of being a teacher. Many graduates passed out from our college, are making a living today by conducting private tuitions successfully.

- Communication skills, presentation skills and leadership qualities developed by our students as peers, has now helped them to be excellent lawyers, advocates, chartered accountants entrepreneurs and police personnel.

Peer teaching has earned rich dividends and is becoming more popular among the student community. It has contributed towards shaping the overall personality of students. It has led to significant improvement of the students academically, psychologically and socially.

#### vi) **Problems Encountered and Resources Required.**

Peer teaching as a practice is beneficial no doubt, but Institution has encountered some problems while implementing it as a best practice. Some of the problems encountered are as follows:

- **Selection of peers is very difficult:** The greatest challenge is in selecting the peers. The students belong to different social and economical background. Most of them are from rural background and introvert and hesitant to come forward as peer tutors.
- **Lack of writing skills:** Many students lack writing skills. Though they are good at communication and presentation skills, they are unable to explain the subject matter in written form.

**Initial hesitation:** Students of Arts and Commerce are shy in nature and hesitate to undertake any new challenging task. Basically, they hail from traditional and socially backward families. They do not have nature of socializing; hence, they are hesitant to be peer teachers.

1. **Lack of general reading:** Reading habit is also most important because it increases the horizon of the knowledge of a person. A well read peer can deliver the subject with the full confidence .But the students are ignorant of important aspects such as national integrity, social responsibility, civic awareness, and overall personality development due to their lack of reading general books.
2. **Few students come forward for peer teaching voluntarily:** Though the process of selection, training and motivation is made by the faculty, efforts become futile since very few students come forward to opt peer teaching.
3. **Lack of computer knowledge:** In addition to the traditional chalk and talk method the peer teacher has to adopt modern methods i.e. ICT based teaching methods,

which need computer knowledge. However, for the rural background students' knowledge of computer has become nightmare. Our Institution is making earnest efforts to acquire the required knowledge by extra computer coaching in their free time .

4. **Majority of students from rural background:** Hubballi is the second biggest city in Karnataka state and it is surrounded by villages. Ours is the reputed and one of the oldest Institutions in northern Karnataka. Majority of our students are hailing from villages, who lack knowledge, courage to speak in English, lack reading habits, and majority of them are first generation graduate learners in their family. It is also a major hurdle in peer teaching process.
5. **Lack of self confidence:** Self confidence is one of the basic ingredients for the teacher. The students are not confident enough to teach their peers. They are timid.
6. **Lack of exposure to teach their junior:** Exposure to worldly developments in various spheres is also important to be a teacher. A teacher has to educate the students with the live examples in the class. They have to make students aware about the current knowledge by giving “Lab to Land” examples. For this the peers need to know and acquire worldly knowledge and exposure.
7. **Not able to prepare synopsis:** Making notes and briefing them in the class in a convincing manner is not an easy task. This needs the earnest and continuous involvement of a teacher. The peer teacher has to make efforts and spare much time in understanding the subject, preparing class notes and briefing them in the class. The peers cannot spend much time for preparation due to other classes.
8. **Inferiority complex:** Most of the problems arise due to inferiority complex. Majority of students are from rural area and basically from Kannada medium, and when they meet with English medium students, naturally they feel inferior to them. Though, the faculty counsels them to overcome their inferiority complex, they continue to think that they are inferior. Hence, correcting this misconception is the greatest challenge in peer teaching process.
9. **Problem of mode of controlling and delivery of subject in the class:** Peer teacher has to control the class otherwise she can't deliver or communicate the subject and make the students understand. Here, at the beginning the faculty will guide the peers

in this regard and also students will be asked to encourage the peers in their role. Some efforts also necessary from the peers to become successful peers.

10. **Inculcating the competitive behavior among the students:** It is the responsibility of the peer teacher to encourage and appreciate a small improvement made by every students in the class, which indirectly motivates the students to do something new which is worth appreciation. With this they start feeling they are also able to achieve in various competitions conducted in the college, through this exercise they develop preparation for competitive examinations in their life ahead.

The above stated problems encountered are resolved in implementing of students peer teaching as a best practice in our college. It has been proved by the evidences given above.

The Institution has all the required physical resources, human resources and library resources to conduct peer teaching. The students have access to ICT based teaching-learning resources. All labs, such as, Psychology lab , Language lab, Computer lab, Commerce lab and Music lab provide the peer tutors all the necessary aid and assistance to prepare the given topic and other relevant information before hand. All the required resources for student's peer teaching are available in the college.

## **ii) TITLE- Counseling to Students**

The globalised scenario has definitely influenced the young minds. The students are under stress to perform better. They are expected to be competitive to find a suitable employment for a comfortable living. Too much of expectations, changes in the family as an Institution, westernization etc , have led to confusion and problems of the students. So our Institution has an active counseling cell where the counselors provide all guidance and assistance to the students to face the challenges of life.

Counseling is adopted as a best practice to help the students realize their potentialities and make choice, adjustment, and improvement and develop a positive outlook.

### **ii) Goal**

The mission of the college is to foster knowledge. Counseling is regarded as the source of help for students with problems and crisis. It can have preventive as well as a remedial function. It is a great source of help to students who belong to different social spectrums. The trained counselors of our college provide assistance, advice and guidance to

students about their personal as well as academic aspects. The faculty of our Institution counsel students with problems and cater to their needs to make them empowered. Counseling is carried out to enable our students

- To overcome lack of self confidence.
- To overcome depression and inferiority complex.
- To overcome problems related to personal and family life.
- To guide them to fulfill their needs and aspirations.
- To overcome problems related to adolescence.
- To inculcate right values.
- To overcome academic problems.
- To overcome stress.
- To develop a proper attitude for social life.
- To realize the need for sound mental and physical health to reach their goals.

### **iii) Context**

The counseling cell takes care to implement the practice of counseling at regular intervals. The counselors assist the students to understand and resolve their emotional problems like fear, hostility, anxiety, jealousy, frustration, nervousness, stress, neurosis etc. The challenging issue of the counselor is to see that the counselee is ready to change herself for betterment of her life. The vital aim of the Institution is to specially help and guide the economically and socially weaker students. Our college being a women's college, has many young girls facing diverse problems. Some of our students are divorced, orphans, physically challenged, students who are married and having problems, students who are married and have discontinued their studies. Some parents have a traditional outlook and don't encourage their daughters to take up higher education. But their wards very much want to continue their studies. Such parents are called and counseled.

#### **iv) The Practice**

Counseling is carried out in a systematic manner keeping in mind that our student differ in their abilities, interests, aptitudes, attitudes etc. The organized counseling helps the students overcome their problems. The mechanism followed to carry out counseling is as follows:

- **Collection of data:-**The data of the students is obtained in the structured format to identify the problems. A format where in all problems are listed is given to students

and are asked to mark their problems. The counselors also collect data through interaction with other faculty and peers.

- **Problem identification:** - The counselors go through the formats of the students, list out and identify the problems. Constant observation of students by the counselors helps them to notice the signs and symptoms of various problems. Behaviour, postures and body language also enable in identifying the problems.
- **Strategies:-** Once the problems are identified, the counselors make use of different and suitable strategies to help the counselees to overcome their problems. The counselors have many sittings with the counselee. Each student with the problem is counseled at a time.
- The lab has questionnaires such as Cyclophyme-Schizothyme, Bells Adjustment, Inventory, Study Habit and Personality Questionnaire to assess the area of problems of the students.
- A separate room is necessary for conducting counseling. The Institution has a psychology lab for counseling students. The counselors also counsel the parents of such students if need be.
- Severe cases, if any, are referred for further consultation to practicing psychiatrist, at his clinic with whom the Institution has a MOU.

v) **Evidence of Success**

The counseling cell of our Institution has succeeded in its mission of counseling students having various problems helping them overcome their problems.

Following are the evidences.

- A student was worried about her **bad performance in the exam** due to poor study habits. She was regularly counseled and easy learning methods were suggested to help her study well. This helped her to overcome retroactive and proactive inhibitions.
- Another student had **inferiority complex**. Her physical disability was the cause for the feeling of inferiority. She used to ask irrelevant and unnecessary questions to gain the attention of the peers .She remained absent to practical class regularly and spent her time loitering outside and eating at the roadside eateries. She also had negative feelings towards her father, because he was too strict with all the family members. This led her to develop inferiority complex. The counselors observed the deviant behavior and after a prolonged counseling for 18 months she was made to

realize that she was far better than other physically challenged people. She accepted her physical appearance, started attending classes regularly. She was also openly appreciated in front of her peers and was assigned the task of monitoring the journal work done by her classmates. This helped her overcome her problems and she went on to score 70% of marks in her final year BA exam.

- Another student belonging to an orthodox middle class family was a good student but had **disturbed relationship with her step mother**. So she was sent to live with her uncle's family. Her uncle was very religious and didn't allow her to even watch TV. This student had an affair with the boy undergoing training in the army. This was opposed by the family members. Her mobile was taken away from her. She lost interest in studies and was irregular to classes because of frustration and dejection. She started doing things just opposite of what was told to her. There was also a problem of sibling rivalry. Through her cousin, the counselors contacted her parents and counseled them to send her to college regularly. She was counseled and this helped to overcome her stubbornness. She attended the classes thereafter and passed with distinction.
- Another student was from a nearby village. She belonged to a very traditional joint family. She was a first generation learner and her orthodox grandparents were very much against the idea of her joining the college. This student also suffered from **inferiority complex as she was physically challenged**. She often used to remain absent due to fever, chest pain and pain in her weak limbs. This ill health prevented her from attending the classes regularly. Her grand parents forced her to discontinue her studies. The counselors noticed her remaining continuously absent and contacted her father. He was employed in small shop and was not ready to send his daughter to college as he strictly followed the decision made by the elders in the family. He was counseled and made to understand that many with physical disabilities have excelled in their lives. The father was convinced and allowed the daughter to continue studying. She was counseled and was given all study materials. She gained confidence, stopped giving lame excuses. She is now determined to achieve something in life.
- This is a case of pampered child, staying with her grandparents. This student had the **problem of adjustment**. She was frustrated staying in her grandparent's house as

they imposed many restrictions. Her marriage was fixed with her relative. When she joined the college she was attracted to a boy and developed a friendship with him. She used to bunk the classes and meet the boy during college hours. The faculty noticed her absence. The parents were called and the counselors came to know that girl had eloped with the boy. The parents brought her back home and so had stopped her from attending classes. The counselors counseled both, the parents and the student. Gradually, the student realized her mistake and decided to concentrate on her studies. Being an average student, she passed her degree in second class and is now married to her relative.

## **6. Problems Encountered and Resources Required**

The counselors of our Institution have encountered the following problems: –

- **Hesitancy to open up** – students are initially hesitant to openly speak of their problems. They hesitate due to inferiority complex, emotional stress and the fear of social stigma.
- **Lack of co operation from parents** – The counselors also, in some cases have faced the problem of non co operation from the parents/guardians. The parents do not readily accept the problems of their ward. To convince them about the observations made by the faculty and peers is not an easy task. They have a preconceived notion that their ward is absolutely fine and has no weakness at all. The parents too are worried of the social setting they live in .They don't attend counseling sessions when called.
- **Fear** – The students also are scared. They are afraid that their secrets, will be revealed and others will look down upon them. So the students with problems do not co-operate completely.
- **Not realistic** – Most of the students with problems are not realistic in approach. They attempt doing things which are not achievable. They live in a fantasy world, think that everything is fine.
- **Hesitant to consult a psychiatrist** – When the counselors arrange meetings of the counselees with the psychiatrist, they do not turn-up, this is because they don't want to have a one-to-one discussion with the psychiatrist.
- Sometimes, lack of family support, being deceived, step motherly treatment etc the physical disabilities also act as a barrier for the students.

The counselors of our Institution carry out their counseling sessions in the Psychology Lab. The lab is quite spacious and well equipped with the required furniture for having a comfortable interaction with the counselees. The lab consists of test kits, records, proforma and all the other stationery items. The lab has questionnaires such as Cyclophyme-Schizothyme, Bells Adjustment, Inventory, Study Habit and Personality Questionnaire to assess the area of problems of the students. The Institution has sufficient resources for carrying out counseling and the counsellors provide honorary service of counselling.
